

POLY-MART 250 GALLON WATER STORAGE TANK

Poly-Mart offers a line of Water Storage Tanks in various sizes as well as eight different colors. Poly-Mart Water Storage Tanks are made from the highest quality rotational molded polyethylene and are designed for above ground use. Poly-Mart backs all tanks with an industry leading 5 year warranty, so you can feel comfortable you are investing in a high quality product. Our tanks have built in UV stabilization to avoid color fading and break down from harsh sunlight. The Black, Dark Green & Dark Brown color limits light penetration, which reduces growth of waterborne algae. Our Water Storage Tanks come equipped with 4 Dome Flats on the top of the tank and 4 Bottom Flats at the base of the tank. These 8 Flats allow for a great flat surface to install additional fittings where you need them most. Poly-Mart tanks can be ordered to your specification including additional fittings and/or upgraded man way lids and bulkheads.
