## Description

The PURAIN DN150-S rainwater filter, also known as the hydraulic jump filter, is the most efficient self cleaning filter available. This innovative product is suitable for in tank, external, and direct bury vehicle rated applications. The injection molded design has a built in skimmer for in tank application, which eliminates the need for a separate tank overflow. The vigorous self cleaning from the highly turbulent hydraulic jump means maintenance requirements are minimal. With 100% capture up to the equivalent of 1" rainfall per hour means overall capture efficiency is rated at 98%. No other self cleaning filter can make that claim.

## Diagrams & Specs.

Specifications	
Rated Maximum Flow (DIN1986)	270 GPM
Max. Flow for 100% Capture	86 GPM
Screen Size	800 Microns
Rated Max. Roof Square Footage	10,000
Rated Efficiency	98%
Skimming Overflow Built In	YES
Direct Burial Capability	YES
In-Tank & External Mounting Capability	YES
Vehicle Rating	60 Tonnes
Weight	13.75 lbs.

## Accessories

Intewa Calming Inlet

Accessories for Direct Burial Installation
