

## BLACKCOMB RACK-MOUNT UV

**INTEGRAL FILTER HEAD DESIGN**

**NEW FILTER HOUSING DRAIN PLUG**

- Integral filter design with o-ring groove for fail-safe installation, higher operating pressure (120 psi), and single manifold heads (NO POTENTIAL LEAKS BETWEEN HEADS)
- LB4 models include integral LED lamp countdown timer as standard
- LB5/6 systems include **LIGHTLOCK™** technology for protected lamp sales
- Flow rates stated at 95% UVT at a UV dose of 30 mJ/cm<sup>2</sup>
- 316L stainless steel, axial flow reactors allow for optimum efficiency & lamp and sleeve service without the need to drain the water (10 year limited warranty on UV reactors)
- Coated UV lamps for consistent UV output throughout life, 9,000 hour LP lamps, 10,000 hours LP-HO lamps
- Splash-proof controller with constant current electronic ballast
